EuroSalary.eu × elevenlabs

Voice-Powered Salary Intelligence for 24 Languages

Grant application to bring AI-narrated salary data to 450 million Europeans in their native language

STARTUP GRANTS PROGRAM

APRIL 2026

Confidential

THE PROBLEM

Salary data in Europe is fragmented, text-heavy and inaccessible

24 Languages

The EU has 24 official languages. Salary data is typically only available in English or the local language, excluding millions of cross-border workers.

Text Walls

Salary reports are dense PDFs and spreadsheets. Nobody reads 20-page compensation benchmarks. Information is buried and hard to consume.

Accessibility Gap

80 million Europeans live with a disability. Current salary platforms offer zero audio alternatives, excluding a massive underserved population.

The result: European workers make career decisions without understanding compensation across borders — because the data doesn't speak their language, literally.

OUR SOLUTION

The institutional ledger of European compensation

EuroSalary.eu is the largest free, multilingual salary comparison platform covering all 27 EU member states in all 24 official EU languages.

17.5K
Static pages indexed by Google

24
EU languages fully translated

27
Countries with salary data

21
Job categories with 3 seniority levels

Content types per country × language:

- Salary comparisons
- Country profiles
- Job comparisons
- City data
- Minimum wage
- Net salary calculator
- Transparency index
- Country pair comparisons
- Sector analysis

TRACTION & INFRASTRUCTURE

Built, deployed and live

Tech Stack

- ✓ Astro 6 SSG — all pages pre-rendered for SEO
- ✓ Cloudflare Pages — global CDN, edge delivery
- ✓ Supabase (EU Frankfurt) — PostgreSQL database
- ✓ Google Search Console — verified, 17.5K pages indexed
- ✓ GA4 + Plausible Analytics — dual tracking
- ✓ Full CRM layer — lead scoring, email sequences
- ✓ REST API — public salary data endpoints

Business Model (4 tiers)

- ✓ **Free** — basic salary data, 27 countries
- ✓ **Professional** (€29/mo) — city-level data, net calculations
- ✓ **Business** (€99/mo) — PDF reports, team access, bulk export
- ✓ **Enterprise** (custom) — white-label, API, SSO

Target Audience

- ✓ HR professionals & recruiters
- ✓ Cross-border workers & expats
- ✓ Compensation & benefits teams
- ✓ Government & policy researchers

THE VOICE AI OPPORTUNITY

Why EuroSalary + ElevenLabs is a perfect match

🎧 24 Languages = 24 Voices

Every page on EuroSalary exists in 24 languages. ElevenLabs' multilingual voices can narrate salary data in each user's native tongue — a use case no competitor offers.

📊 Structured Data = Perfect TTS Input

Our data is structured, numerical, and factual. No hallucination risk. Ideal input for high-quality text-to-speech conversion.

🚀 Scale: 17,500 Pages Ready

Every one of our 17,500+ pages can have an audio summary.

ElevenLabs visibility on EuroSalary

- ✓ Audio player on every salary page
- ✓ "Powered by ElevenLabs" badge
- ✓ Link to ElevenLabs on every page with audio
- ✓ Grant logo in website footer (12 months)
- ✓ Blog post: "How we use AI voices for salary data"
- ✓ 17,500+ pages × 24 languages = massive reach

USE CASES

How we'll use ElevenLabs

Audio Salary Summaries

Every salary page gets a 30-60 second audio summary. "The average software engineer salary in Germany is €62,400..." Users can listen instead of read.

17,500 pages × 60 sec avg = ~290 hours of content

Multilingual Narration

Same salary data narrated in the user's native language. A Polish worker in Germany hears the report in Polish. True cross-border accessibility.

24 languages × 27 countries = 648 country+lang combinations

Premium Audio Reports

Business tier customers get narrated PDF country reports. 5-minute voice briefings for HR teams who need quick salary intelligence during commute.

Premium feature driving €99/mo conversions

Accessibility Compliance

Audio alternatives for all data-heavy pages. Meet EU Accessibility Act (EAA 2025) requirements. Serve visually impaired users across Europe.

EU regulatory compliance = competitive moat

MARKET OPPORTUNITY

European HR Tech is a €15B+ market

450M

EU citizens across 27 member states

17M+

Cross-border workers in the EU

73%

of EU workers research salaries before job changes

€15B

European HR Tech & compensation data market

Why voice matters for this market

- ✓ Mobile-first: 68% of salary searches happen on phones
- ✓ EU Accessibility Act mandates audio alternatives by 2025
- ✓ Cross-border workers need data in their native language
- ✓ Audio salary briefings fit commute consumption patterns
- ✓ HR teams want quick voice summaries, not 20-page PDFs

Competitive advantage

No European salary platform offers voice-narrated data in 24 languages. Glassdoor, PayScale, and LinkedIn Salary operate English-first. We go native-first.

IMPLEMENTATION ROADMAP

12-month voice integration plan

Month 1-2
Foundation
API integration. Audio player component. Generate summaries for top 500 pages (EN, FR, DE, ES). Test voice quality across languages.

Month 3-4
Scale
Expand to all 24 languages. Automated pipeline: data update → text generation → TTS → CDN. Cover 5,000+ pages.

Month 5-8
Premium
Audio country reports for Business tier. Voice-narrated salary alerts. Podcast-style weekly European salary briefings.

Month 9-12
Full Coverage
Audio on all 17,500+ pages. Conversational voice search. Enterprise audio API for B2B clients.

Estimated character usage over 12 months:

~8M
Audio summaries
(17.5K pages × ~450 chars)

~12M
Premium reports
(country × language narrations)

~10M
Weekly briefings &
salary alerts

Total: ~30M characters — well within the 33M grant allocation

THE ASK

What we need from ElevenLabs

Startup Grant

33 million characters over 12 months to build voice-narrated salary intelligence across 24 European languages.

What ElevenLabs gets in return

- ✓ **Massive multilingual showcase** — 24 languages, live
- ✓ **17,500+ pages** with "Powered by ElevenLabs" badge
- ✓ **Footer logo** on all pages for 12+ months
- ✓ **Case study** for ElevenLabs grants program
- ✓ **Blog post** + social media promotion
- ✓ **EU institutional credibility** — Eurostat data source
- ✓ **B2B exposure** to 500+ companies using the platform

Why now?

EU Accessibility Act entered force in 2025. Companies must provide accessible alternatives for digital content. Voice narration is the most natural solution.

EU Pay Transparency Directive (2026) requires salary range disclosure. Demand for compensation data is exploding across Europe.

First mover — no European salary platform has voice narration. Whoever does it first in 24 languages wins the accessibility and mobile market.

EuroSalary.eu × elevenlabs

Let's make salary data speak every language

Ready to integrate. Ready to scale.
